

We are writing because we do not want LPFM to replace our local K-Love radio signal. Our family listens to K-Love at home DAILY and at work when possible, on 105.5 FM. Our children are 8 and 10 years old and love the contemporary music of K-Love and it provides a great way to bridge the generation gap in our home. Many of our friends and neighbors listen to and are ministered to by the broadcasts on K-Love. We see lots of K-Love t-shirts and bumper stickers around our town.

We enjoy the commercial free aspect of K-Love as well as the family-oriented content, making it very "kid friendly" and safe for families to tune in at any time of the day or night. The station provides helpful information and tips for families, promotes good values, and provides tips for parents, as well as information about local Christian events, speakers, and concerts. The staff is available for prayer support as well, which we have taken advantage of as have many of our friends.

Our family and friends also enjoy listening to K-Love in other cities when traveling. It is a comfort to know that family and friends traveling in other states or overseas in the military can listen to K-Love "with us" via the internet. The service K-Love provides to our community is invaluable. There are very few "family friendly" broadcasts available these days - but K-Love provides that option in our community. It is important and in the public interest to have the K-Love radio station to provide wholesome, clean, and always "descent" commentary and music that people of all ages can listen to and enjoy. It also is an important outreach when people are "shut in" due to illness, as my wife has been this year. In addition, many young people in our community tune into K-Love late at night when they feel most confused and alone. There have been many testimonials broadcast about the benefit received through the music and encouraging commentaries spoken on K-Love -- and many of those testimonials (including abandoned suicide decisions) have come from listeners within our local community. How many radio stations provide that kind of help in a community! Please let us keep our local K-Love stations (105.5, 89.1, and 100.9).

Respectfully,
Kevin & Suzanne McIntyre
