

This has to be stopped and reviewed. The transaction between TWC and CTT is creating a monopoly and is just wrong. Time Warner Cable is only offering digital phone to replace existing phone. Only 1 number is allowed. For people with multiple lines or business' will lose the other numbers. It does not work with dial up modems. Therefore we are being forced to switch to TWC as internet providers now. Also we went basic phone service for 10 plus taxes to 39.99 at minimum up to 49.99 depending on other services currently being provided by TWC. Verizon will not come in and offer service as a provider of last resort. There is no illec for this community. We have been recvng notices and being told via telephone that this is a done deal and we have to switch cause ctt's services will be switched off on 11/30/04. We have not recvd any notice from the FCC regarding this issue. Had we, more complaints and issues would arise. Please stop this from happening until other issues are resolved. If this approved, you will have created a monopoly of service in this one area that no one else can or will touch. We need this to opened up to everyone. I am not one that is going to be adversely affected by any of this. I will actually benefit by my bill being lowered. Other's will not be as fortunate. WE ARE BEING FORCED SLAMMED AND CRAMMED TO HAVE DIGITAL PHONE. CTT has filed with the Texas PUC to prevent verizon from coming in and TWC knows of this and therefore it is not an unregulated deal. There are a lot of concerned citizen's that do not know what to do or how they can find out more information. TWC will tell us nothing other than lets get you converted and then deal with the other issues. Yeah right...they can't and wont cause they do not have the ability to provide for more than 1 line of service and provide analog service to fax machines and modems. Currently we have that and will lose all of that with this deal. Please help us.
