MOTION FOR EXTENSION OF TIME

The Consumer Electronics Association (CEA) requests to extend the deadline for reply comments in the above-captioned proceeding (“the NPRM”) by 45 days beyond their current date of December 30, 2004.

We support the intent of the Commission to allow for unlicensed device operation in the vacant broadcast television bands. However, we must ensure that unlicensed devices do not interfere with broadcast TV reception.

To do so, CEA has carefully examined the proposals outlined in the NPRM and submitted initial comments. Additionally, we are in the process of finishing our field-testing. Some of the field-test results were not complete in time to be included in our initial comments. Furthermore, we continue to work with other interested parties to develop consensus solutions.

At this time, we believe that an extension is necessary to finish our field-testing and review and effectively respond to other submitted comments. CEA continues our commitment to finding technical solutions that will allow for unlicensed use of vacant TV channels on a non-interference basis. In order to best serve the public interest, additional time is needed to provide a complete and thorough technical analysis of the complex NPRM and develop comprehensive technical solutions to interference concerns.

Respectfully submitted,

Veronica A. O'Connell
Senior Director, Government Affairs
