

To the FCC:

As a private citizen who places a high priority on her right to privacy, I would ask the FCC to discourage changes to the current configuration of the Wisconsin "Do Not Call" System. In addition to viewing this issue as one that concerns my right to privacy, I regard this as a quality of life issue as well. Certainly the serenity of my home life has improved greatly after the implementation of the "Do Not Call" list in 2003, and as a writer, serenity is necessary to my livelihood. I might add that it appears that many of my fellow Wisconsinites also appreciate this law, in light of the huge percentage (80% by some estimates) which have requested to be added to the list.

Thanks for your time,  
Patricia Gott
