**Re: CC Docket No. 02-53, Presubscribed Inter-exchange Carrier Charges**

Dear Ms. Rosenworcel:

At your request, Verizon is submitting information pertaining to the proportion of Presubscribed Inter-Exchange Carrier changes (“PIC Changes”) processed manually versus the proportion of mechanized PIC changes.

For 2004, the only data that Verizon has readily available is that from the former Bell Atlantic region. In these states, mechanized changes accounted for approximately 23% of the total volumes, and the manual changes accounted for approximately 77%. This data reflects an adjustment to remove the impact of a one time anomaly, when, according to Verizon’s merger agreement, some customers in Pennsylvania and Virginia were moved within the company from the former GTE network to the Verizon long distance network.

Sincerely,

A handwritten signature in black ink that reads "Richard T. Ellis".
