**UNITED STATES CELLULAR CORPORATION
QUARTERLY E911 IMPLEMENTATION REPORT**

United States Cellular Corporation ("USCC"), by its undersigned attorneys, hereby submits its tenth quarterly E911 implementation report pursuant to the Commission's order staying certain E911 phase II deadlines for many non-nationwide wireless carriers.¹

I. Introduction

USCC is a Tier II carrier under the *Order to Stay* issued by the Commission in 2002.² As a wireless carrier with systems serving many small markets, USCC faces particular challenges in upgrading its technology and interacting with a wide variety of PSAPs across its service area. To meet these challenges, USCC has dedicated substantial financial and personnel resources to accelerate the deployment of E911 service throughout its service area. USCC personnel maintain regular communication with PSAPs that are at varying levels of readiness in the provision of E911 service. In addition, USCC closely monitors its E911 vendors to facilitate

¹ See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadlines for Non-Nationwide CMRS Carriers*, Order to Stay, 17 FCC Rcd 14841 (2002) ("*Order to Stay*").

² *Id.* ¶ 23.

its goal of E911 deployment to all requesting PSAPs.

USCC has experienced great progress toward the successful provision of E911 service throughout its service area over the last several months. In 2004, USCC completed its ambitious four-year, multimillion dollar project that converted all of its TDMA markets to CDMA. During this quarter, USCC significantly reduced its backlog of outstanding phase II requests, deploying phase II service to all requesting PSAPs in Cook County, Illinois. USCC continues to be proactive with the PSAPs in its service area to ensure prompt roll-out as the PSAPs become ready and able to utilize the phase I and phase II E911 information. USCC's willingness to work with each PSAP in its service area has resulted in agreements with every PSAP affected by delays in phase I or phase II deployment.

II. Status of Phase I Requests

USCC and its E911 vendor, TeleCommunication Systems, Inc. ("TCS"), actively work with all requesting PSAPs to deploy phase I E911 service throughout USCC's service area. In numerous cases, USCC has proceeded with deployment despite the fact that a particular PSAP request does not amount to a valid request for service under the Commission's rules, including in some markets where the PSAP made only an oral request. In addition, in USCC's newly-acquired markets, USCC has proceeded with phase I or phase II roll-out to the entire market despite the fact that in some cases USCC received no formal request from a particular PSAP within that market.

To date, USCC has received 738 requests for phase I service and successfully deployed phase I service to 704 PSAPs. This represents approximately a 95 percent deployment rate for phase I service. Of the remaining 34 outstanding phase I requests, eight have been

pending less than six months. Attached as Appendix A is a spreadsheet identifying those PSAPs requesting phase I service and the markets in which USCC has deployed phase I.

USCC has 26 PSAP requests for phase I service that have been pending for more than six months. USCC maintains regular contact with PSAPs in all of these markets and has reached an agreement with each PSAP to delay phase I roll-out. In these cases, phase I deployment has been delayed due to circumstances beyond USCC's control. The majority of these outstanding requests (18) are from PSAPs serving the Milwaukee, Wisconsin market, where the delays are a result of the PSAPs not having the appropriate equipment to receive and implement phase I service. In North Carolina, phase I roll-out has been delayed for two PSAPs because they are not ready for drive testing and for one additional PSAP due to budgetary concerns related to its use of a stand-alone ALI database. One market in Indiana has experienced a delay because the PSAP lacks the appropriate equipment, and phase I roll-out is delayed for one market in Virginia due to ALI database connectivity issues. Phase I deployment has been delayed for one PSAP each in Oregon and Idaho due to problems with the trunks provided by the LEC. In each market where phase I deployment has been delayed beyond six months after the PSAP request was made, USCC has an extension agreement with the affected PSAP. In addition, in each of these cases, USCC is ready to drive-test as soon as the PSAP and/or the LEC resolve any remaining obstacles.

III. Status of Phase II Requests

USCC continues to deploy phase II E911 service as required by the Commission's rules and its *Order to Stay*. To date, USCC has received 359 PSAP requests for phase II service. USCC has successfully deployed phase II E911 service to 336 PSAPs in its service area, representing a 94 percent deployment rate and an increase of 79 PSAPs for which phase II

service was deployed in this quarter. USCC currently has 23 outstanding PSAP requests for phase II service. Of these outstanding requests, 11 have been pending less than six months. The attached spreadsheet identifies those PSAPs requesting phase II service and the markets where USCC has deployed phase II.

USCC has 12 phase II requests that have been pending more than six months. In each of these circumstances, the delay in phase II roll-out is the result of the fact that either the PSAP or the LEC is not ready for deployment. Two PSAPs serving markets in Polk, Iowa have experienced delays in phase II roll-out due to technical difficulties associated with the mobile switching center. Deployment is projected for March, 2005 for these markets. LEC issues have resulted in the delay of phase II roll-out for one market in Idaho, and lack of PSAP equipment is the reason for delayed phase II roll-out in three markets in North Carolina, and one market each in Illinois, Indiana, Wisconsin and West Virginia. USCC has obtained agreements from each affected PSAP to delay phase II roll-out until 60 days after the PSAP is ready and able to utilize the phase II information. In these cases, USCC and its vendors have completed all the necessary steps toward phase II deployment and are waiting for the PSAPs to make the necessary corrections to or upgrade their systems.

In CDMA jurisdictions where new phase II requests have been received, USCC continues the process of installing necessary software loads on its switches to provide phase II service and upgrading all the trunking between these switches and the Mobile Positioning Center of its E911 vendor, TCS. USCC and TCS continually integrate the CDMA switches serving these new phase II markets with the TCS equipment and the phase II software. USCC also contracts for the provision of monthly updates to the Base Station Almanacs (BSA) for all its cell

sites serving CDMA markets where it has received a phase II request. The BSA improves the accuracy of location information provided to PSAPs.

As noted in earlier quarterly reports, USCC has contracted with Marconi Corporation to do the necessary calibration, accuracy and drive testing to ensure that USCC's phase II service meets the Commission's accuracy requirements. Marconi has conducted testing on USCC's CDMA switches that are serving PSAPs with live phase II deployments. These tests have been conducted using the CDMA location-capable mobile phones currently available to USCC's customers. Marconi's accuracy test results confirm that USCC is meeting the Commission's requirement that 67 percent of the calls are accurate to within 50 meters and 95 percent of the calls are accurate to within 150 meters.³ Marconi performs a complete accuracy test every six months on every USCC switch where it has deployed phase II service.

IV. Status of Handset Deployment

USCC remains in substantial compliance with the applicable handset deployment benchmarks.⁴ In its ongoing efforts to increase penetration rates of GPS-enabled phones, USCC has pulled back all non-E911 enabled phones still in inventory at all of its retail locations in CDMA markets as of May 2004. USCC continues to track its sales of GPS-enabled phones in order to ensure compliance with the penetration benchmarks in the Commission's *Order to Stay*. In January 2005, 99.9 percent of the total handsets sold by USCC had E911 capability. This represents substantial compliance with the Commission's May 31, 2004 deployment benchmark that 100 percent of new activations be GPS-enabled handsets.

³ 47 C.F.R. § 20.18(h).

⁴ See *Order to Stay* ¶ 27.

Currently, USCC has 16 GPS-enabled handsets available for sale in its CDMA markets: Kyocera KE-434, Kyocera KE-414, Kyocera SE-47 (to be replaced by Kyocera SE-44 upon inventory completion), Kyocera 7135, Kyocera KX-1, Kyocera KX-2, Nokia 6585, Nokia 6019i, LG VX-6000, LG VX-5550, Motorola C343, Motorola V262, Motorola 710, Motorola 810, Audiovox CDM-8900, and Audiovox CDM-8410. USCC no longer places any purchase orders for non-E911 capable CDMA handsets nor does it restock non-E911 capable CDMA handsets sold at USCC's retail locations.

V. Conclusion

As demonstrated above, USCC continues to make significant progress in deploying E911 phase I and phase II service throughout its service area. The commitment of significant financial and personnel resources has enabled USCC to move closer to its goal of meeting or exceeding the Commission's implementation deadlines for E911 deployment.

Respectfully submitted,

Enhanced 911 Emergency Calling Systems)
)
_____)

AFFIDAVIT OF JAMES JENKINS

I, James Jenkins, hereby declare as follows:

1. I am Vice President, Legal and External Affairs, for United States Cellular Corporation ("USCC"). In this capacity, I am familiar with USCC's E911 deployment efforts.
2. I have reviewed the foregoing USCC Quarterly E911 Implementation Report and believe that the facts contained therein are true and accurate.

I declare under penalty of perjury that the foregoing is true and correct, to the best of my knowledge and belief.

Dated this 25th day of January, 2005.

James Jenkins

CERTIFICATE OF SERVICE

I, Jennifer Tatel, do hereby certify that on this 1st day of February 2005, copies of the foregoing "United States Cellular Corporation Quarterly E911 Implementation Report" were served by U.S. first-class mail, postage prepaid, to the following:
