

It is time to up hold the Do Not Call List . To allow businesses to call just because they have someones number and did some sort dealing with people defeats the purpose of the thing ! Actually I don't think it goes far enough . There are other places that can be looked into as bothersome too . Take all the credit applications that end up in mail boxes everyday and all the junk mail on the computer inboxes . Just because you have a place available for it doesn't mean it needs to be filled with unsolicited trash . We as Americans make enough waste without being given more paper waste in our mail boxes . As for the internets daily bombardment of get rich quick scemes , on-line smokes , and viagra ads is maddening . What next are overnight businesses going to start calling cell phones at randon to sell their ideas or useless products . Take a stronger stand on the Do Not Call List and JUST SAY NO , there is more work to be done to keep pest from invading hard working peoples leasure time . Thank You for giving the public the right to say NO don't let it start over again through legal loop holes .
