ELECTRONIC FILING

Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
The Portals, 445 12th Street, S.W.
Washington, D.C. 20554

Re: IB Docket No. 00-248
Ex Parte

Dear Ms. Dortch:

On February 15, 2005, the following individuals met with Barry Ohlson, Legal Advisor to Commissioner Adelstein, concerning the above-referenced proceeding: Kalpak Gude of PanAmSat Corporation ("PanAmSat"); Karis Hastings, counsel to SES Americom, Inc.; and the undersigned, counsel to PanAmSat Corporation.

The parties asked that the Commission adopt the proposals made by the Satellite Industry Association ("SIA"), of which they are members, in the proceeding, and requested an opportunity to explain further the basis for the SIA proposal to the extent that the Commission has any concerns with it. They addressed in particular the following elements of the SIA proposal:

- In order to be routinely licensed small Ku-band antennas only would need to begin complying with the Section 25.209 antenna gain pattern at off-axis angles of 1.5° instead of the current 1.25°;

Ms. Marlene H. Dortch

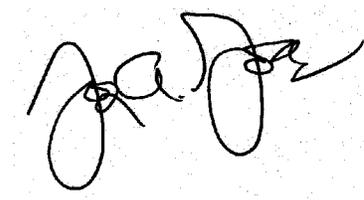

February 16, 2005

Page 2

- Small Ku-band antennas that begin to comply with the Section 25.209 antenna gain pattern at off-axis angles of greater than 1.5° and up to 1.8° also would be approved if the applicants demonstrated they could achieve pointing within a specified tolerance; and
- In light of their well-established track record, no new restrictions would be applied to multiple access techniques employing contention protocols.

Please direct any questions concerning this filing to the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Godles", with a stylized flourish at the end.

Joseph A. Godles
Attorney for PanAmSat Corporation
