

FCC,

My wife and I value obtaining Internet service from my independent ISP (Sonic.net), and BellSouth's petition asking the FCC to stop regulating broadband service would badly affect consumers with regards to available choices of Internet service for broadband. Effectively eliminating any competition, where BellSouth could set any price it wanted. Competition is the heart of the American system; don't allow the mega corporations like BellSouth to crush the little guys. We need the little independent providers to keep the playing field even. DO NOT GRANT BELLSOUTH THEIR PETITION ASKING THE FCC TO STOP REGULATING BROADBAND SERVICE!!!
