

Dear FCC,

* I support the petition to require VRS interoperability because I am frustrated with the different ways to call people on videophone because I require the visual communication such as American Sign Language Grammar.

* I don't like that my VRS is blocked and sometimes I have to wait. I don't like being dark age ... where's my rights?

* It is very important to make everyone equally accessible by setting up one system just like the telephone. Because we're equal.

* The different ways cause stress and can put us at risk. Please make whole video relay service (VRS) equal with same system. Because when I was told to have a surgery, I was unable to understand why, so I called VRS to make a call to my doctor and understood why I had to go through. I really thanked VRS for solving this situation. If not for VRS, I may refuse to admit the hospital.

Thank you for this opportunity to make my comment.

Mary
