

VP-100 (Sorenson Videophone) does not allow me to choose another VRS as Sprint VRS, Hamilton VRS, etc. when Sorenson VRS was very busy.

I can't call anybody who has D-Link videophone. I can call anyone who has Sornson videophone. That is not fair as public telephone.

I had to have Sorenson videophone and D-Link videophone but they can't run same time because of one ip address. I can't afford to add another internet as second ip address. I have to run one of two. For sample, I use one videophone and someone can't call me on another videophone.

I feel that Sorenson is overpower to control U.S. Please help to be fair.

Thank you
