

I would like to see Voom HDTV continue operating Rainbow-1 at the 61.5 frequencies. I have had this service for almost a year now and find it to be a true alternative to the only other two services available (Directv and Dish Network). I am a believer that competition is needed in the airwaves and particularly in today's milieu of ever increasing consolidation of media outlets.

I hope that you will consider my comments in any actions you choose to take in this matter.

Yours truly,
Lou Torres
