

I would like to file comments against the sale/transfer of assets, licenses and authorizations held by Rainbow DBS Company LLC to EchoStar Satellite LLC.

I choose to subscribe to VOOM over it's competitors because of VOOM's outstanding HD broadcast selection. The quality and quantity far surpasses VOOM's competitors.

Losing VOOM would mean a return to antiquated, inferior quality broadcasts and a step backward for the future of digital television.

VOOM is the future of television available now! I hope the FCC will give VOOM the opportunity to continue to operate and broadcast.
