

I petition the FCC not to allow the transfer of Rainbow 1 assets and other related assets from Cablevision to EchoStar. VOOM was born out of a vision to provide quality High Definition programming to the public at a level that will encourage the growth of HD consumption. VOOM HD LLC has demonstrated a real desire to continue operating Rainbow 1 at the 61.5 frequencies. In the past, the FCC has ruled in favor of increased competition and consumer choice. I believe that this is truly in the best interest of the public.
