

Please act against the transfer of the Licenses and Authorizations held by Rainbow DBS Company LLC to EchoStar Satellite LLC. I am a former Dish Network subscriber, currently a Voom subscriber and believe, based on track record, that the transfer would adversely impact HDTV programming availability in the US. Voom provides a service unavailable from any other provider. In addition, some of Voom's exclusive programming is comparable and often better than PBS programming and the demise of Voom would severely impact the available choice of consumers. Thank you.
