

You should not allow the Sale of the Rainbow-1 Satalite and use of the 61.5 frequencies from Rainbow DBS Company LLC. to EchoStar Satellite LLC. I believe that this sale would result in a step backwards for HDTV and that it would greatly limit the amount of HDTV programming currently availble to consumer and thus limit the encouragment for them to upgrade to the new standard already being promoted by the FCC as the way of the future. Thank you for your consideration in this very important matter.
