

Voom has been the answer to my prayers. None of the other satellite providers or cable companies in my area offer the amount of HD programming that Voom does. The other companies won't increase their offerings without this competition. Voom LLC has the desire and commitment to continue providing this service, and to do so they will need to retain the satellite Rainbow-1. There has been a dramatic increase in subscribers over the past 6 months - please don't let this wonderful service die!
