

The pending sale of assets from Rainbow DBS Company LLC to EchoStar Satellite LLC is not in the public interest. Rainbow DBS has consistently demonstrated its place as an innovator and leader in Digital TV, especially HDTV. Selling assets to EchoStar furthers EchoStar's clear goal of creating a complete monopoly of the satellite television market in North America. The U.S. is already falling behind Europe and Asia converting to digital broadcast. Keeping Rainbow in business is one of the best ways we can stimulate the migration to HDTV in the U.S. While EchoStar and Direct TV stagnate Voom continues to add new capabilities monthly. Please keep competition alive and technology moving forward by denying this sale.
