

I will be a customer of VOOM satellite services on March 31st.

I was recently a customer of Echostar/Dish Network Satellite Services and was pleased with the services that I received until recently. Mr. Egen wishes to expand his channel offerings to more locals and international programming than to expand his HD channel lineup.

I choose to sign up to VOOM because VOOM's mission is to deliver the most HD programming in this country. They have so far done that and as of recent events they showed no signs of slowing down.

Charles Dolan is rumored to not have been involved with the sale of the the S. Dakota earth station nor the VOOM Satellite located at 61.5w degrees. With recent events taking place he wants to continue broadcasting VOOM television programming from that orbital location as well as from AMC6. I highly support Mr. Dolan in continuing his dream of making VOOM a competitive player in the Satellite Industry.

A few years ago you denied Dish Network & DirecTV to merge as a single provider. Today both Dish & DirecTV will not do anything that benefits it's customers without waiting to see what the other is going to do so that they can top it.

Today VOOM not only broadcasts the most HD programming that is available today but they are not watching and waiting for their competitors to make a move.

I SUPPORT VOOM is there actions and I believe that with time they will be competitive in the MarketPlace today. A Demand has already been proven by the rise in HDTVs and the fact that more people today are subscribing to an HD programming pack with their service provider not only shows that HD Programming is on the rise but it also shows that VOOM and it's programming are destined for SUCCESS.

Please ALLOW VOOM to stay in operation today, tomorrow & FOR MANY YEARS TO COME.

If you choose to deny VOOM to stay at the 61.5w orbital location, please allow them enough time to get their programming moved over to the leased satellite and us customers to get installed with the new dishes.

THANK YOU FOR YOUR TIME,
Amanda Bright
