

I would like to make a comment concerning CA 's petition for FCC to make Video Relay Services Interoperable. This allows users to have equal time and personal decision on who they want to contact and when instead of waiting long times for availability from one company. To be limited to one company is a monopoly that should not continue.

Please make a rule that would discontinue requirements that deaf and hard of hearing users be limited to one company. It is not being equal as ADA requires.

Thank you for listening to my comments on this public petition,
mary ALice Gardner
