

Dear FCC,

I support the petition to require VRS interoperability because I am frustrated with the different ways to call people on videophone with only one contract company and won't access to get into their service.

I don't like that my VRS is blocked and sometimes I have to wait for the longer period of time to get into my Sorenson Video relay service in which my contract is with them so I have to use to dial 711 to get access in no time.

It is very important to make everyone equally accessible by setting up one system just like the telephone with equal accessibility like what the telephone company offer to the hearing counterpart so we should treat the same way.

The different ways cause stress and can put us at risk. Please make whole video relay service (VRS) equal with same system. So that way I can be able to reach any video relay service with different companies such as Sorenson, HOVRS, and the othe companies that offer the service for the video relay service to reduce the hassle and risk in case if the person need some kind of emergencies.

Thank you for this opportunity to make my comment.
