

I believe that allowing cellphone usage is an extremely bad idea that will cause more stress, noise pollution and conflict on our already overcrowded airplanes. With the added security hassle, overbooked flights, added baggage and consumption of alcohol on board, the addition of cellphone usage only creates an environment prone to more disagreements/hostility and potential for in-flight fights/lawsuits/injuries. Keep the cellphones OFF the plane!! Thank you, Sincerely, William Cahill- AA Flight attendant, based in Miami for 20 years.
