Re: WC Docket No. 05-65; SBC Communications Inc and AT&T Corp.  
Applications for Approval of Transfer of Control

As business owners, we are excited about the merger between these telecommunication giants. It's great news, not just for businesses, but also for consumers!

This merger will create much-needed competition, which, in turn, will drive down pricing. The strengths of SBC and AT&T will ensure innovation and product development that is necessary in today's business climate.

The merger between SBC and AT&T will maximize the strengths of both companies resulting in greater flexibility and choice in the market place. The Cable industry, which includes monopolies like Comcast, has precluded competitors like SBC and AT&T from entering the market place. This merger will ensure that Cable companies are not just the ONLY source for telecommunications needs.

Sincerely,
