Re: WC Dkt. No. 05-65

Dear Ms. Dortch:

On April 25, 2005, an ad hoc coalition of 33 telecom manufacturing companies filed comments (i) urging the Commission to approve the proposed SBC/AT&T merger on grounds that the merger is likely to increase aggregate investment in telecom infrastructure and (ii) explaining the basis for the coalition participants' belief that the merger will result in higher investment in telecom products.

We request that our companies be added to the list of manufacturers signing the ad hoc coalition's April 25 comments. We have reviewed these comments, and we agree with what they say.

Respectfully submitted,
