Dear The Federal Communications Commission,

Dear Chairman Martin:

Congratulations on your appointment to Chair the FCC. In your new leadership role, I urge you to support the "Fair Share Plan" as a solution to current concerns with the Universal Service Fund (USF). The Fair Share Plan will keep the USF fair, ensuring that consumers like me do not pay the same rate into the USF as big businesses, regardless of how little I may use long distance.

The Keep USF Fair Coalition submitted the Fair Share Plan to the FCC on January 31, 2005. It expands who pays into the USF so that other technologies - not just phones - pay into the system. The Fair Share Plan collects the USF using a combination numbers- and revenue-based plan. This keeps the system fair, equitable and non-discriminatory.

Under the flat fee or numbers-based plan you are considering, people like me who make few long distance calls would pay the same as people or businesses that make many calls. I believe it would be unfair to charge low-volume and residential customers the same fees as high-volume residential or business customers.

Another concern of mine is 911 for the many cell phone users who travel world wide and with today's technology those in severe accidents can't be found until it is too late. What can be done about this problem and will benefit the human race? What will this cost? It seems to me that the world needs such service free as there are so many fees, hidden cost and monies going to phone usage. I'd rather be paying 911 expense for the USA than send monies for a "WAR" in other countries. We, in the United States are in need of the billions of dollars. However the mind set of a "eccentric" or we can do your country a big favor by stepping

in to run your government attitude needs to stop and take care of
business at home here in American.

I urge you to keep the USF fair, and adopt the Fair Share Plan.
Thank you, and best of luck in your new position.
