

Here in the United States we value our time with our families and or other things and do not want to be bothered by the phone unless it is family or an emergency.

So many of us have to live using a telephone, that the last thing we want to hear is it ringing when we get home from work or on our off day.

The worst 3 things I personally hate are, an alarm clock, telephone, beeper, and or now a cell phone, for as I said, when we have to live with one on a daily basis you learn real fast to hate, it's like being on an electronic leash!!!

If anyone messes with what few things we fought for and finally have to our benefit, it won't be anytime until big brother and big business are completely controlling what little time we have alone or with our families.

LEAVE IT ALONE & BACK AWAY!!! Or there will be allot of angry voters out there, and believe me, they won't forget who was involved in changing any part of this as it is now!!!

We must have States Rights!!!

Read our Constitution and quit trying to read around it and or amemd it!!!

WE THE PEOPLE, NOT WE BIG BUSINESS!!!
