

I think it is a bunch of crap that the financial institutions are selling our information that we give them. That information should be strictly for what they need it for and nothing else. They need to be stopped and stopped right now. I think that these financial institutions should not receive any of our information if their whole intention is to sell it. I also think that lifting the "NO CALL LIST" is a bunch of crap, also. I do not request a private number just to be disturbed by some bonehead wanting me to by some crap off of them. I want it all stopped, and any thing I can do to help put a stop to all of this just email me and I will do everything I can to help.
