

I am pleading with FCC do not allow any one or company to water down our right to privacy. I want to set at home eating my meal and be with my family in peace. I am tire the way companies, solicitors, and those asking for me to donate money are allow to interrupt my peace and quite. I have the right to be left alone and not bother by any one on the phone. I pay for the right to have the phone and that does not give any one else the right to harassing me with it. Again as a Disable Veteran and a Tax payer, I am asking FCC do not allow any one to water it down Indiana do not Call List .We created it for a reason and also do not create National Do not call List that make our useless.
