

Certainly not! Time Warner already has a monopoly on cable TV and as an ISP in the Rio Grande Valley.

There needs to be more choices not mergers.

No, I am not satisfied with cable prices and service. Time Warner cable now charges a fee of \$1.00 to the customer for making a payment at their office here in Harlingen. A \$1.00 fee is not much to the sole consumer but this does add up for Time Warner in the long run. It is ridiculous to add on charges that have never been there before. Charges like this, and no competition continue to make cable more expensive to have.

As for service, my internet connection was going out, as of Sunday. They told me the earliest a technician could be out was Wednesday. They did not even offer to credit me for lost service time. No, service has not improved.

Local national channels(ABC,CBS,NBC) are received but there is no public access channel. These channels rely on their own funding.

This country is growing too much into a monopoly haven for big corporations. This needs to be stopped and scaled back.
