

The purpose of this correspondence is to express our institution's support of the business practices utilized by Sprint during negotiations to lease a portion of our EBRS capacity. At no time did I feel that any member of the Sprint team applied undue influence or pressure on us or attempt to "bully" us in our dealings. They were very professional, straightforward and ethical throughout the process. As spectrum management is not our primary business, we did retain legal counsel to represent us in this matter. As far as I am aware, our representation only experience positive interactions with Sprint staff as well. Moving forward, we are very comfortable with continuing our relationship with Sprint and have only the most positive comments regarding their professional behavior and protocol.
