

\* A “non-local” station (WIMZ of Knoxville) is creating massive interference for our local WPVM-LP due to the unique contours of our mountainous terrain. \* LPFM stations, especially those in challenging mountainous terrain, should be permitted to own translators. \* I support the FCC position on getting rid of the obsolete regulation of “third adjacent channel” spacing. \* I support the FCC's efforts “to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating.”
