

Re: New band of spectrum for community wireless forks & others

Thank you for opening up the spectrum for uses that will help them bridge the digital divide. I'm very interested in EQUITABLE access to technology and your recent decision is the right step in this direction. To continue in this direction, please oppose the ideas of Intel, Motorola and others to severely limiting access to this by their proposal for the FCC to restrict access and rights of others to this new band of spectrum.

Thank you,
Ithaka Anderson
