

I would like to thank the FCC for the much needed 3650-3700MHz spectrum. I fully support WISPA's response to the petition.

We are a Wireless ISP in central MN. We are dealing with the same problems as many WISP's are today, Interference, and Foliage.

There is no shortage of licensed spectrum, and most of it is sold out of the WISP's budget. I request that the 3650-3700MHz licensing rules be left the way they are.

Thank you
