

I am a member of Continental Airline's President Club and use their facilities in Boston at Logan Airport. Since I don't live in Boston, I don't have the type of access required to use their airport wide Internet access. It seems like requiring the use of their Internet access system discriminates against people who just fly through Boston occasionally vs people based in Boston. Continental provides a great service to me as a traveler and I hope that you move to allow Continental to continue to provide this service to me. Business travelers have done a fairly good job of taking the extra burden of travel in the last few years. Please don't let Logan Airport add to our burden.
