

I am a Continental frequent flyer. I use the Continental Airlines Presidents Club all the time for business. One of the reasons I choose to fly Continental is because of this marketing tool. When I change planes I use the internet program-- President Clubs-- immediately--purely for the access to the internet. This is a absolute must! I am an independent businessman and truly find it deployable Boston wants charge for this. I was in Boston last week when I heard of this. I was truly dumb-founded!!!! When the hotel industry [90%] now includes this as a free marketing tool, it tells me how incredibly greedy they are! Are they going to attempt to regulate all coffee shops and other business' that use this free internet as a marketing tool. What happened to the free economic "USA" system. The fact is simple-attempt to make me pay for internet --I just will find another way to communicate. I will not pay them!
