

I am a Continental Airlines frequent flyer (member since its' inception in 1982) and 'Lifetime' member of its Presidents Club.

I support Continental's Petition to the FCC. MassPort has no right to insist we, the paying public, use its' predesignated for-fee services for wireless internet services. I want Continental to be able to continue to provide its own wireless service -- which is a free service to President's Club members -- to me and other members at Boston Logan and other airports. Continental's service is reportedly seamless and consistent, wherever I fly and whichever President's Club I visit. Such is not the case for MassPort system and other airports' providers; they vary across the country. Flying for business or any reason is difficult enough these days, without having to be a software and hardware engineer to facilitate secure wireless communications.

Thank you for ensuring the right of the public to use the wireless service of its choice.
