

I have been a long-time Continental Airlines frequent flyer and member of its Presidents Club and I support Continental's Petition to the FCC to continue to offer wireless service Boston Logan and other airports. This service is very important to my productivity. Since 9/11 and I have to get to the airport earlier than ever to pass security and I spend many productive hours before the flight and during lay-overs getting email and other internet work done while waiting to fly. I don't know the politics involved, nor care. I just know that this service is invaluable to me and my business. Thank you for ensuring the right of the public to use the wireless service of its choice.
