

The ability to connect to the Internet from virtually anywhere has become a key driver for conducting business. As one who travels practically every week, having Internet connectivity in locations such as Continental's President's Club enables my productivity. As we challenge other countries for the right to conduct business within our own country, we must maintain our technology enablers. Therefore, I support Continental's Petition to the FCC. I want Continental to continue to provide its own free wireless service to me and other members at Boston Logan and other airports.
