

I have a small business and fly often on Continental Airlines--Their free internet service in the President's Clubs is very important to me--It allows me to conduct business during layovers and delays that are part of flying these days. Owning a small business, expenses are critical, so every dime counts! Also, every minute counts--and having to negotiate sign-in, paid internet access at a variety of different airports results in monetary losses for my small business.

I strongly support Continental's petition to the FCC.
