

I am a Continental frequent flyer. I spend a great deal of time in various airports around the United States as I travel in support of specialized health care services in various acute care hospitals. I have enjoyed and greatly benefited from the free (provided as a President's Club member) wireless internet access that I utilized on almost every visit to a President's Club. I have, on occasion, purchased wireless access in certain airports without a President's Club location, but the quality of service and immediate access through the Continental President's Clubs has been more efficient and overall more useful. I encourage the FCC to continue to permit Continental Airlines to provide its own wireless internet access as a superior service and as a benefit to me as a club member without forcing Continental Airlines to utilize an outside mandated wireless provider.
