

Regardless of the intentions to make a national no call listing, please allow the state of wisconsin the right to maintain it's own registered no call listing and preserve our rights to be included on such a list. If anyone wishes to be contacted by telemarketers etc. they can refrain from putting themselves on the list as they are currently doing. I however do not wish to be solicited by telemarketers at ANY time. While you're at it, look into more controls on e mail spam that is taking place with less than favorable materiels (especially porn) I am tired of that too.
