

It is very important to me as a consumer rights advocate that the WISP network operators are allowed this band. Overall I feel that the WISP operators have demonstrated that they are responsible stewards of bandwidth and their networks have largely benefitted myself and many others whom would NOT have any options available for broadband internet with out these operators. I also know that we as consumers are enjoying the ability to obtain competitive telecommunications solutions and these additional bands will benefit consumers and the operators. Please have me on the record as being a supporter of the release of these channels to unlicensed spectrum.

Thank you,
Mark Williams
