

As an owner and operator of a small WISP I would like to add my support to the idea of make this spectrum available without license or at the very least some form of limited license (such as the proposed 3650MHz spectrum).

As a small business it is not feasible for me to bid on spectrum yet those who have purchased the spectrum do not utilize it in my area. Cases in point both the 2.5Ghz and 700MHz licensee's have not utilized this spectrum in my area and have no plans to do so in the future. Meanwhile several operators are utilizing the part-15 bands to their fullest extent and are quickly approaching saturation.

I urge the FCC to release more spectrum to those of us who will gladly use it to provide internet service to those who do not have other viable alternatives, rather than auctioning it off to yet another large corporation who will for all intents and purpose sit on the spectrum and do nothing.

Thank you for your time and consideration,

Sam Tetherow
