

Where I live, there are two broadband options: Bellsouth & The Cable Company (Insight). Even the independent ISPs use Bellsouth for broadband transport. Our prices aren't going down, they're going UP!!! We have GOT TO get some competition in here, and I understand that with all the trees we have, that direct line of sight transmission makes it very difficult to deploy broadband to my home. Please see the wisdom of opening up an entirely new competitive paradigm in Kentucky.
