

Please consider:

Captions are often cut off from one program by another (KEYT Channel 3 in Santa Barbara cuts off Movie of the Week programming)

Emergency broadcast **MUST** have captions (use a different line for captioning so that **ALL** information is visible)

Local weather...I want it **ACCESSIBLE!** Nothing more frustrating than watching a half-captioned news program! Please don't consider "something better than nothing."

Thank you for your considerations to this very important issue.
