

I am writing to complain about the lack of quality interpreting on American TV. There have been times when I have been DYING to see a show, and I can't watch it without getting all frustrated because the captions are extremely distorted, late, or totally absent. This is also a big problem with live newscasts. I know there are many Deaf people like myself who use captioning and TV in order to stay aware of the events that are occurring in the world. When the captions are mangled and incomplete, it is frustrating and does not provide the equal quality that it should.
