

I am getting frustrated with the lack of clear, accessible captioning on television...especially the news programs. In the evening after 10pm, CNN doesn't have captioning overnight until 7 am. I have also had problems with the local NBC station not captioning their news programs in real time or just simply using a script which means nothing.

Some of the NBC programming's captioning is AWFUL!!! it's captioned, but it comes out garbled.

It's important for people like myself to have FULL ACCESSIBLE CAPTIONING, especially since I live in a tornado and severe storm area. And the right to have the SAME ACCESS as people who hear!

Thanks!
