

I am a member of a deaf household. Although I am hearing, my husband is deaf and we rely on the closed-captioning to keep up with the news and dialog of our favorite programs and sporting events. Lately, the quality of the closed-captioning has been noticeably decreased so that we were unable to enjoy or understand what was being said. Please require the networks to monitor their transmissions so that they are aware of problems to cause these challenges for the deaf and others who depend on clear captioning. Thank you.
