

I certainly agree with the demand for accurate and available closed captioning. It is not fair to us to suffer the burden regarding lack of information flowing all over the world. I nearly don't watch the news because half of the time, it's not closed captioned. I can't watch about 1/4 of the available channels on my cable tv because it has no CC either. Enough of that please. It's not that complicating to fix it. Thank you.
