

As a citizen who is hard of hearing, I support closed captioning on TV because I don't always hear everything that is being said on TV. Closed captioning is a tool that helps me understand what is being said in a movie or program. So please enforce closed captioning for the deaf and hard of hearing. There are at least 28 million people who are deaf and hard of hearing that rely on closed captioning for information on TV. Update and enforce closed captioning so that people who are deaf and hard of hearing are not left out in society.
